

Our Product : Decoration Solution

Safety

Is more impact resistant than glass. If subjected to impact beyond the limit of its resistance, it does not shatter into small slivers, but breaks into comparatively large pieces.

Weather Resistance

Will withstand exposure to blazing sun, extreme cold, sudden temperature changes, salt water spray, etc. It will not deteriorate after many years of service because of the inherent stability of acrylic resins.

Dimensional Stability

This product expands and contracts due to changes in temperature and humidity, it will not shrink with age.

Rigidity

Is not as rigid as glass or metals. However, it is more rigid than many other plastics such as acetates, polycarbonates or vinyls. Under wind load and acrylic sheet will bow and foreshorten as a result of deflection.

DOOR GLASS DECORATION

*Designs appearance may look different depending on the glass door proportions
